

# Deforestation and South East Asia

Madison Vorva and Marc Los Huertos

August 19, 2017

## 1 Introduction

### 1.1 Objectives

Each student will analyze different sections / regions of SE Asia and determine the amounts of deforestation, estimate Palm plantations area and fire frequency and area – and calculate the carbon loss from the forests and habitat loss for endangered XX?

NOTES from Madi:

Global Forest Watch: <http://www.globalforestwatch.org/>

Forest monitoring designed for action

Global Forest Watch offers the latest data, technology and tools that empower people everywhere to better protect forests.

### 1.2 Methods

using QGIS or ArcMap or ???

Madi suggests we use ArcGIS (ESRI's web based platform).

Question: Does CUC have student accounts for this? Marc has emailed Warren to find out.
